

In the Claims:

A substitute claim set is attached on a separate sheet. Minor changes have been made to the claims, including elimination of some (but not all) instances of the terms “high” and “low”, clarification of inner/outer in reference to a spacecraft, addition of numerical emissivity values to a dependent claim, and changes of the word “means” where necessary. Reference to the “heat-emitting inside” of the craft may be found near the bottom of page 7 of the specification as originally filed.
